

CAP & LID FEEDERS

Speeds over 1,200 /min
All Types of Caps & Lids

3 Types

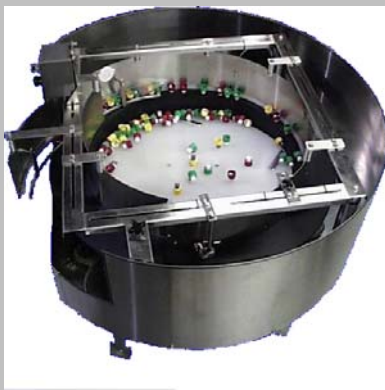

- CENTRIFUGAL BOWLS
- DISC SORTERS
- VERTICAL ELEVATORS

Product Features

- > Discharge tracks to match new or existing machinery. (Telescoping tracks available)
- > Stainless steel & FDA approved contact materials.
- > Variable speed DC drives
- > Level Sensors to control both the infeed and discharge for automatic operation
- > Controlled by our PLC or Yours
- > Base frame to stand alone or mount to your base
- > Adjustable tooling for additional components

RNA Feed Systems

CENTRIFUGAL BOWL feeding 'sport cap with cover' at 700 /min

DISC SORTERS comes in various sizes

- > Uses a simple "disc plate" as the change part
- > Adjustable qualifiers for additional caps & lids
- > Single, variable speed drive

VERTICAL ELEVATORS comes in various widths and hopper bin capacities

- > Bulk bin is built in and has pre-feed belt
- > Reversible discharge side & chute assemblies

Options

- > Multiple lane discharge
- > Wash-Down or Explosion proof electrics
- > Class 100 – Sterile room applications
- > Bulk hopper/Elevator pre-feeders. Up to 100 Cu.Ft bins
- > Air-conveying pre-feed systems (Transport great distances via airflow through tubing)
- > Gaylord/Tote lift & dump (all electric) for added capacity and easier loading.
