- > Maintains single pouch separation.
- > Transfer chutes/tracks to match up with you bagger, cartoner, tray former or wrapper.
- > Multiple feeders from one control panel.

MODEL OT-18-6 Sugar packs at 220/mins. Two insertions into cartoner buckets

MODEL OT-18-6 Inserting single sweetener packs into cartoner at 210 per minute

MODEL OT-18-3 Inserting single pretzel salt packs into bagger at 50 per minute

No more cutting from the strip!

Single & Multiple count discharge!

Use for batch counting and specific quantities into containers or infeed into other machinery

- > Units can be expanded in the future for higher speeds and larger pouches.
- > Tray and Chute assemblies are change parts which allow you to feed different types of pouches on the same machine.
- > Matrix Feeding! Unit can be installed over a multilane tray former and feed pouches into more than one pocket or blister at the same time. (Unit to right feeds into 6 lanes at same time, unit below does 3 lanes)
- > Feeding into continuous or intermittent motion conveyors, cartoners, VFFS, HFFS, Tray formers, box indexers, and bucket conveyors.
