RNA showcases a versatile high speed orienting system **ZE3000 at NPE 2012**

RNA will exhibit a versatile high speed orienting system at the NPE show to be held at Orange County Convention Center, April 1-5 2012.

RNA are teamed up with Palace Packaging Machines to offer special purpose custom built systems.

This model ZE3000 LINEAR FEEDER will be fully operational at **Booth # 36023** (Palace Packaging Machines).

FREE NPE 2012 GUEST PASS

Use **[THIS REGISTRATION LINK](#)** to register now with our compliments. Get you **FREE NPE2012 Expo Pass** – a \$120 value!*

* Discount only applies to advance registration. NPE2012 onsite registration is \$120.

The ZE System 3000 Linear Feeder will feed, orient 100%, and discharge a spray cap at a single point at a rate of 2,000 per minute! The ZE is unique in that it has compact & modular design plus a quick & easy changeover. It offers single or multiple lanes of discharge and variable layouts to accommodate many different applications.

This system with its multiple tracks eliminates the need for large, multiple bowl feeder layouts. Its low profile design allows for easy access to all components for comfortable changeovers and through cleaning.

More information including the system specification can be found at RNA website www.rnaautomation.com.

ZE3000 videos are also available from [RNA YouTube Channel](#). 

If you know of anyone else that would be interested in attending the show please feel free to forward this information, or send us their details. We look forward to seeing you there.
