

Sorting and Feeding of Cable Fasteners

Feeding & Handling System
Ref.221

Description:

Sector

Electronics Industry

Component

1 type of cable fastener

Technical Requirements

Positionally correct sorting and arrangement singly at the end of a linear stretch for extraction by a customer handler

Discharge Position

According to available conveyer position sketch.

Operation Description

Separation at the end of a linear stretch through transverse removal

Performance

> 30 parts per minute.

Control

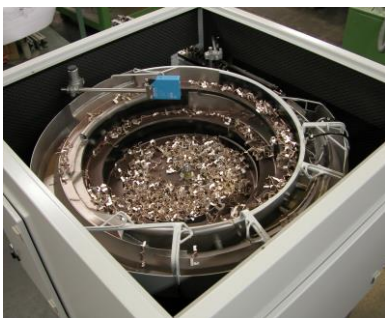

Bowl feeder, linear conveyer

Elements of the Feeding System

Bowl feeder, linear conveyer, separator, basis frame, noise protection hood.

Design

RNA-Standard
