

Sorting and Feeding of Rubber Stoppers

Feeding & Handling System
Ref.286

Description:

Sector

Pharmaceutical industry

Component

9 types of rubber stoppers

Technical Requirements

Correct orientation and feeding to customer's machine.

Discharge Position

Axis vertical, hanging, radius to radius large diameter pointing upwards.

Operation Description

The components are dosed from the hopper into the vibratory bowl feeder on demand. Orientation is carried out in the vibratory bowl feeder and the tooled tracking on the linear feeder.

Performance

73 to 132 parts per minute

Elements of the Feeding System

Hopper, vibratory bowl feeder, linear out feed track.

Design

Pharmaceutical Design

Special features of the system: Quick product changeover system for hoppers, vibratory bowl and linear feeders.
